## NW 'Midas' Stored Value (SV) Smart Cards

Midas SV SmartCards entitle the holder to travel at the appropriate fare, by presenting their SmartCard to the target on top of the Wayfarer 200 ETM, the money for the fare then being deducted from the SmartCard and a ticket for the journey requested being issued, all without cash changing hands. Most of our current ticket range can be purchased by means of the Midas SV SmartCard. Available funds are shown in the space usually occupied by the "Concession Free" block next to key (L6), when a SmartCard is on or near the target.

Midas SV Cards can be topped up on-bus, in amounts of £5, £10, £15 & £20, and also in the Travel Shop in which the original purchase must be made – Midas SV Cards are not available to buy from new, on-bus). A distress facility has been added to the Midas SV Card, whereby if the holder is short of funds on their SmartCard for a requested ticket, a cash amount can be added to the money already on the SmartCard so as to enable a chosen ticket to be purchased subsequently from the SmartCard. It is suggested that this facility is used sparingly, so as to avoid continual use by individuals, particularly on school buses.

Annulments must be made, with the appropriate SmartCard present on the ETM target, and follow the normal procedures for making such transactions. Cash refunds should not be given for SmartCard transactions.

Transactions made with Midas SmartCards do not show on the cash value of your Driver's Waybill, but the passenger figures do include them. Any top-up transaction will show, however, as cash will have been taken for this type of transaction.

The card status may be checked by placing the SmartCard on the target, pressing the "P" key, then by (R5) SmartCard Status and (R3) to print a report.

See **Staff Notice 164/13** (displayed at the Depot) for detailed procedures for the use of these SmartCards.
